State Outdoor Business Alliance Network

Inspiring the Future Outdoor Recreation Economy

Summer 2021
Outdoor business alliances across the country—from Alaska to New Mexico, North Carolina to Maine, Michigan to Idaho—have joined forces to elevate the vital importance of a thriving outdoor industry.

The State Outdoor Business Alliance Network (SOBAN) strives to strengthen America’s outdoor recreation economy in ways that leverage the interlinked potential of commerce, infrastructure, and participation.

SOBAN focuses on what can best be accomplished together through collaboration on policy and advocacy, research and branding, leadership and partnerships, and sector development. Outdoor business alliances share knowledge, opportunities, and best practices, working alongside national industry partners and state offices of outdoor recreation.

SOBAN’s vision for America’s outdoor recreation economy includes robust businesses, thriving outdoor places, and equitable outdoor recreation opportunities for all people. SOBAN prepared this report to inspire pathways for the outdoor recreation economy in every state.

www.soban.org
Outdoor recreation is a large and growing employer.

Nationwide, outdoor recreation employed almost 5.2 million people in 2019 who earned more than $226.3 billion dollars. For comparison, outdoor recreation employs about the same number of people as are employed in the nation’s hospitals, and twice the number employed in farming.

Outdoor recreation is a large contributor to GDP.

The Bureau of Economic Analysis (BEA) estimates the contribution of outdoor recreation in terms of its contribution to Gross Domestic Product (GDP). In 2019 the value-added contribution of outdoor recreation to the U.S. economy was $459.8 billion, representing 2.1% of GDP.

"I’ve seen first-hand what the outdoor industry can accomplish when we stand together. We have the opportunity to make incredible strides for the long-term health and success of our people and our communities by getting people to go outside.”

- Jennifer Pelkey, Board of Directors, California Outdoor Recreation Partnership
Outdoor recreation exists in a variety of industries.

Value-added contributions from arts, entertainment, accommodation and food services (28% of total), retail trade (21%), manufacturing (12%), transportation (11%) and wholesale trade (8%) are among the largest contributors.¹

¹ Nineteen states, including Arizona, Michigan, Pennsylvania, and Washington, have more than 100,000 people employed in outdoor recreation.

² California and Florida have more than 500,000 people employed in outdoor recreation.¹
“The outdoor recreation industry diversifies our economies and has a significant impact in local communities. Manufacturing and engineering also attracts talent from all over the world to Colorado, and we are proud to contribute to that.”

- Doug Dragoo, Mayfly Outdoors, Montrose, Colorado

Outdoor recreation consists of many activities.

Value-added (or GDP) contribution by activity in 2019.3

- Boating: $36 billion
- RVing: $19 billion
- Apparel & Accessories: $49 billion
- Travel: $201 billion
- Hunting/Shooting: $9 billion
- Fishing: $5 billion
- Game Areas (Incl. Golf & Tennis): $19 billion
- Bicycling: $2 billion
- Motorcycling/ATVing: $9 billion
- Snow Activities: $6 billion
Outdoor recreation contributes to economic success in many ways.

TOURISM
Visitors who come to enjoy the outdoors spend money on lodging, restaurants, and other services, creating jobs and putting money into the community.

NEW RESIDENTS
Places with recreation amenities on federal public lands have higher rates of in-migration, helping fuel jobs for teachers, doctors, construction workers, and more.

ENTREPRENEURS + TALENT
Access to the outdoors and a high quality of life attracts and retains new businesses and skilled workers.

RETIREMENT + INVESTMENT INCOME
Wealth from retirees and investors—who are drawn to live near outdoor access—helps boost the local economy.

GEAR MANUFACTURING
Companies that make outdoor equipment tend to locate in places with outdoor amenities, providing jobs and investment in the community.

MAIN STREET BUSINESSES
Restaurants, grocery stores, gear stores, and other local retailers benefit from visitors and new residents.

TAX REVENUE
Spending at local businesses and increased property tax revenue contribute to the tax base.

HEALTHIER RESIDENTS
Access to the outdoors improves public health and reduces costs of chronic conditions, especially for impoverished and under-resourced neighborhoods.
Outdoor recreation continues to grow.

Participation in all forms of outdoor recreation continues to grow, from 151.8 million participants in 2018 to 153.6 million in 2019 and 160.7 million in 2020. Participating grew by 1.2% from 2018 to 2019. In contrast, from 2019 to 2020—in the midst of the coronavirus pandemic—participation grew by 4.6%. New participants are younger and have more racial, ethnic, and gender diversity.  

In 2020:

- Bicycle sales +121%
- Boat sales +70%
- RV sales +11%
- Fishing +12%
- Hunting +8%
- Camping +28%
- Hiking +16%
Investments in outdoor recreation pay dividends.

Investments in workforce development – like New Mexico’s Youth Conservation Corps and Biddeford, Maine’s Pepperell Mill revitalization to retrain textile workers – help to build a skilled workforce for the next generation.

Investments in infrastructure like trails, fishing access, and boat launches bring visitor spending that directly supports many types of jobs, businesses, and local governments. In the Methow Valley, Washington, the extensive summer and winter trail system supports economic activity resulting in $6 in salaries for local workers for every $1 spent to develop and operate the trails.15

Expenditures by Americans on gear, supplies and services purchased while recreating outdoors generates $65.3 billion in federal tax revenues and $59.2 billion in state and local taxes.16

In Montana, recreational fishing is big business, and the state has invested heavily in developing access to its 170,000 miles of rivers. More than $50 million have been spent to build fishing access points, a significant return on investment given the $900 million spent per year in the state by anglers.17

For 56 years, the Land and Water Conservation Fund has provided critical funding for protecting parks, wildlife refuges, and recreation areas at the federal, state, and local levels. LWCF funds have helped protect iconic outdoor spaces in all 50 states in communities large and small. The 2020 Great American Outdoors Act fully funded LWCF for the first time, investing $900 million annually into the program.18

“Biddeford, Maine is creating manufacturing jobs and providing on the job training for a new generation of skilled textile workers. Outdoor recreation not only delivers real, direct economic value to our state, but the success of companies like Hyperlite Mountain Gear also fuels the growth of vibrant economic hubs and creative centers across Maine.”

–Mike St. Pierre, CEO, Hyperlite Mountain Gear, Biddeford, Maine

The tourism sector contributed $373 million in tax revenue in 2019 in Vermont, the equivalent of $1,420 tax savings for every household in the state.
Recreation counties attract new residents.

Across the U.S., the economies of rural places, small cities, and large metros that depend on outdoor recreation outperform their peers, on average. After the 2008 Great Recession most rural counties with recreation amenities gained population, while most rural counties without recreation amenities lost population. This difference is particularly significant as population loss threatens the future of many rural places.

Retirees, business leaders, and entrepreneurs who move to outdoor recreation communities support many economic sectors like health care, construction, and retail. Many of these new residents first visited as tourists. People moving to recreation-dependent communities have, on average, higher incomes than people moving to communities that are not dependent on recreation.

“When I was considering moving, Vermont fit the parameters of what I wanted in a home best—access to world-class recreation opportunities, rural landscape, small towns, resilient ecosystems, community support, and local agriculture.”

–Claire Polfus, GIS professional, Sheffield, Vermont

Outdoor recreation will help lead economic recovery after the pandemic.

During the pandemic, participation in outdoor recreation increased significantly, despite the challenges felt around the globe with production, distribution, and maintaining workforce. As the world recovers from this pandemic, outdoor recreation will continue to grow and drive the recovery. Communities will return to hosting large sports gatherings such as bike, trail, and ski races. These opportunities will bring back lost jobs and revenue important to local businesses.
"Our community understands that the key to wealth is diversifying our economic base. Energy, tech, healthcare, and manufacturing jobs are crucial to economic vibrancy on the Western Slope. And these industries have a workforce that demands access to recreation and the outdoors—both of which the Grand Valley has in abundance."

–Sarah Shrader, Owner, Bonsai Design, Grand Junction, Colorado
Outdoor recreation attracts new businesses.

Access to outdoor recreation is leveraged by many areas to attract new businesses and employees, even in sectors unrelated to the outdoors. A survey of the 50 fastest growing businesses in Utah revealed “Utah's outdoor lifestyle and access to a variety of outdoor recreation opportunities were among the most frequently considered factors when deciding to locate their business in Utah or to expand.”

Other areas use their access to outdoor recreation to attract outdoor gear manufacturers, highlighting their natural amenities as a way to recruit skilled employees and test products in companies’ backyard. Places with a history of manufacturing, and the skilled labor force and infrastructure to accompany it, build on that capacity to capitalize on outdoor recreation.

- **Diversify economy.** Connections with local economic development entities can leverage the recruiting power of outdoor recreation to diversify the economy beyond tourism.
- **Anticipate housing pressure.** Outdoor recreation businesses can support local solutions through partnerships with local governments and nonprofits engaged in social services and housing.
- **Create inclusive access:** Developing infrastructure that reflects how different abilities, cultures, and ages recreate can encourage more inclusive participation in outdoor recreation.
- **Reduce natural resource impacts.** Long-term planning with scientists can help protect sensitive areas and minimize the impact of infrastructure.
Outdoor recreation supports diverse goals.

**Public health:**
Outdoor recreation improves the mental and physical health of residents, particularly among young, elderly, and low-income residents, who are those usually the most difficult to reach. In **Colorado**, the Mesa County Public Health Department hired a full-time trails coordinator to encourage more locals to use the trails network.

**Equity:**
Access to outdoor recreation—including parks and trails and other small, informal green spaces—has been shown to improve the health and quality of life for groups that historically have been marginalized. In **New Mexico**’s Outdoor Equity Fund provides grants to allow all youth equitable access to the outdoors, with a particular focus on kids from underserved backgrounds.

**Transportation alternatives:**
Improved infrastructure for bike and pedestrian travel has been shown to reduce traffic congestion, improve air quality, and help avoid injuries to cyclists and pedestrians. In **Washington**, the Mountains to Sound Greenway is a 100-mile corridor connecting the Seattle waterfront to Ellensburg, featuring trails for both recreation and transportation.

**Resilience to natural disasters:**
Several communities have used recreation infrastructure to mitigate flood risk. They include a bike path and park in Lincoln, **Nebraska** and a greenbelt along a bike path in Fargo, **North Dakota** where water can flow during floods. Sports fields, like some in Tulsa, **Oklahoma**, also function for water retention during extreme events.
A call to action

The vision for America's outdoor recreation economy that includes robust businesses, thriving outdoor places, and equitable outdoor recreation opportunities can be realized in every state. This report describes pathways to success and the economic benefits that result from investment.

To continue making progress, the outdoor sector needs:

1. **Infrastructure development and funding for parks, trails, transportation, education, and related needs to maintain healthy lands and waters and ensure access for all people;**

2. **Business support that fosters collaboration, sustainable growth, and innovation;**

3. **Talent pipelines to build a skilled workforce for the future jobs and careers in rural and urban communities; and,**

4. **Marketing resources that drive economic activity to outdoor recreation destinations and ensure quality and equitable experiences in the outdoors.**
